

TOOL HOLDER FOR ROUND FIXTURE

TOOL HOLDER FOR ROUND FIXTURE

The tool holder for round fixture is suitable for the fixing and replacement systems for the Cabe slotting machines.

Realized in **rectified steel**, the tool holder is characterized by an advanced tool holder fixture, that allows the **repeatability of the fixture of the tool**.

An **advanced internal refrigerant cooling system** helps the chip leakage during machining.

The tool holder, realized in **one single piece** (monolithic), guarantees stability and precision when cutting.

Advanced internal refrigerant cooling system.

The tool holders Cabe are produced according to the UNI 6604 regulation.

The tool holder is produced in one single piece (monolithic).

Suitable for the tool holder block with high repeatability.

BORING BAR CODE	DIMENSIONS (MM) A	INSERT CODE
BA4	60	UT4
BA5	60	UT5
BA6	70	UT6
BA8	80	UT8
BA10	80	UT10

BA25L	300	UT25
BA28	220	UT28
BA32	240	UT32
BA36	260	UT36
BA40	260	UT40

NB! The tool holders **BA28 - BA40** cannot be purchased online. Please contact our offices for orders at tools@cabe.it.

TOOL HOLDER LENGTH

The line is composed of tool holders suitable for cutting rectangular keys with the width sizing from **4 mm to 40 mm**.

Some are available also with **two different lengths** to suit every cutting need (standard or "L" codes).

For high slots it is necessary to use the longer tool holder.

The tool holder's dimensions depend on the **measure of the insert used for the cutting**. Please consult the table for the right combination.
